

PIERCAN USA INC.

Your Glove Containment Expert

ANNOUNCEMENT

CSM
Chlorosulphonated Polyethylene
(Formally Hypalon™)

*Raw Material
Supplier Change*

PIERCAN USA will complete its transition of CSM raw material suppliers by November 1, 2011.

We will begin shipping gloves made from the Tosoh CSM chips starting September of 2011. These gloves include our standard 'Y'- CSM(Hypalon™), 'UY'- polyurethane/CSM(Hypalon™), and USY – polyurethane/radiation shielding/CSM (Hypalon™).

It is important to note the supplier change started two and one-half years ago, when DuPont decided to close their CSM (Hypalon™) manufacturing plant in Beaumont, TX. After an arduous R & D process, PIERCAN's worldwide operations chose the Tosoh raw material after testing three different suppliers. Tosoh 530 was the closest match to the DuPont CSM 40 and this allowed PIERCAN to keep our formulation and technical specifications the same. Therefore, the gloves you received and used for many years are the same formulation, have the same feel, and the same chemical and mechanical properties as the gloves you will receive in the near future.
