MATERIAL CERTIFICATE

We confirm that our CSM Gloves are made from materials that are non-animal origin. In addition, no materials derived from TSE/BSE (Transmissible Spongiform Encephalopathy and Bovine Spongiform encephalopathy) relevant animal species come into contact with the product or the equipment used in its manufacture.

Thus the European Agency's guidance on the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products (EMEA/410/01) is not applicable.
