Change Control Announcement # 017

Dear Customer,

Beginning January 1, 2016, we will offer Serial Numbering on our gloves. This program will offer a unique serial number per glove. This will allow for individual traceability within your process to track glove change-outs, maintenance, etc. The serial number will be printed underneath the Piercan USA standard printing. The format will be YY-XXXXX, the two digit year followed by a unique 5 digit number. This serial number will not replace our internal traceability; it is simply an added tool to be used by the end user.

Formatting example: 16-00059

I remain at your disposal for any questions.

Sincerely,

Taylor Farias  
Sales Manager
