

PIERCAN USA INC.

Your Glove Containment Expert

ANNOUNCEMENT

Color Change

**Gloves made with
Polyurethane**

To Whom It May Concern:

Notice to all customers purchasing these types of gloves:

1. Polyurethane
2. Polyurethane/CSM (Hypalon)
3. CSM/Polyurethane/CSM

PIERCAN USA is transitioning *the color* of its polyurethane *from blue to green to yellow*. The change of the color does NOT affect the mechanical properties of the material. The material and the gloves will continue to meet all current glove specifications. For dual polymer products, such as UY gloves, the high visibility yellow Polyurethane enhances the ability to see potential damage to the CSM layer.

If you have any questions, please contact PIERCAN USA.
