

Announcement:

Validated Sterile Product Line

Piercan USA, Inc launches our Validated Sterile Product Line. Available as of 3/1/2013, we will supply ready to use, Validated Sterile gloves. Our Y, UY, and YUY material gloves will now be available certified sterile. The Validated Sterile product line will replace our Gamma Irradiated line. This upgraded product will come with a one year shelf life from the day of sterilization. A Validation Compliance Letter will be provided with each shipment of Validated Sterile gloves to provide documented proof of sterility. The gloves will be validated SAL of 10^{-6} (26.1 kGy – 50.5 kGy).

The Validated Sterile gloves will be sold in specific quantities depending on their port size. (Please see chart below). Gloves will be provided in cleanroom compatible packaging. Each Validated Sterile glove will be individually bagged in a heat sealed cleanroom bag. From then, two gloves will be over bagged as a pair in a heat sealed bag. This allows one sterile glove to be used without compromising the sterility of the second glove.

Port Size	Quantity per Box
6"-8"	10 pairs
9"-12"	15 pairs
Short Isolator Gloves	15 pairs
